

# Structural Insulated Panels

## SIPs

Structural Insulated Panels, or SIPs, are a game changer — we are the only factory in California and the ONLY factory-built company using SIPs!

- High-Performance building systems for residential and light commercial construction
- Manufactured under factory controlled conditions.
- Can be fabricated to fit any building design.
- Extremely strong, energy-efficient and cost-efficient.
- Pre-Fab Innovations is a member of the Structural Insulated Panels Association (SIPA), guaranteeing high quality standards and effective installation.

- **30% More Efficient** — SIPs are tight and efficient, qualifying building for many energy efficient certifications.
- **Sustainable** — Sourced from unused raw materials
- **Labor Reduction = Cost Savings** — Patterned designed allows time saving operations and quick build times.
- **Intermediate Panels** — Panels are created in modules, allowing for quick build and easy design modifications for personal design.

**Structural Insulated  
Panel Association**
